

Notes on Homework #9 You Just Submitted (C Programming for Beginners)

You did it! All homework assignments are done now. I hope you are already on your way to complete your final. Make sure to first design your algorithm, then start writing the code, that way you will not miss out any of the requirements.

Reminder for the Naming Conventions and Descriptive Comments:

Here are full guidelines for naming conventions and descriptive comments:

A) Naming Conventions:

- Names of functions should be matching their purpose, also make sure the first letter is lowercase, and names match what they do, for example: findTeenager() or printTeenager() (instead of ageCheck(), or ageIdentify()), doCalculation() or doMath() (instead of calculator(), math() etc.), getMaxNumber(). Mark names of methods are verbs, and they start with lower cases.
- If you write one file each problem (with one main function) then use nouns (teenagerfinder.c, calculator.c etc.), Mark the nouns, and all lower case letters.

B) Here are coding and commenting guidelines:

- 1) https://www.cs.swarthmore.edu/~newhall/unixhelp/c_codestyle.html
- 2) https://www.techonthenet.com/c_language/comments.php (c Style Code)
- 3) [https://en.wikipedia.org/wiki/Comment_\(computer_programming\)](https://en.wikipedia.org/wiki/Comment_(computer_programming))
- 4) <https://users.ece.cmu.edu/~eno/coding/CCodingStandard.html>

Please check a file "SampleDocumentation.pdf" in this and other modules.
