

**Notes on Homework #4 You Just Submitted**  
**(C Programming for Beginners)**

You should write descriptive comments of your application (the main file which has main function in it), and functions. You also must use suitable names of your functions and applications as well based on what they do. Do not give a name like Homework\_4 etc.

Please use the guidelines I provided in previous modules.

You will keep losing points for not providing proper comments of your code, and not providing proper names of functions and the file (which becomes your application names eventually (e.g., appname.exe)!
